

SEPPE WATERJET CUTTING GARNET

Garnet - Excellent Abrasive Grain Used For Blasting, WaterJet Cutting, Water Filtration.

Chemical Analysis	%	Physical Data	
Al ₂ O ₃	15-22	Shape	Angular, Sharp
MgO	5-6	Color	Red
SiO ₂	34-38	Specific Gavity g/cm ³	3.7-4.1
Fe ₂ O ₃ +FeO	25-33	Bulk Density g/cm ³	1.8-2.1
CaO	1-6	Hardness Mohs	7.5-7.8

HS Code

2513200000

Particle Sizes

#60, #80, #100, #120.....

Regular Packing

25kg/bag (54 bags) in 1.35MT big bag PP with 4 loops.

SEPPE TECHNOLOGIES

Believe In Good Materials!

SEPPE Garnet for waterjet cutting, they're extracted from almandine, since it is more angular in form, more efficient in cutting. Mixed with very high pressure water, garnet is used to cut steel and other materials in waterjets.
